SHOCKWAVE[®]

FOGGING CONCENTRATE

Shockwave® is unmatched fogging concentrate technology that delivers the highest-level immediate control combined with the benefit of NyGuard® IGR activity. Shockwave provides flushing action and quick knockdown, plus residual activity. Shockwave contains NyGuard IGR that mimics naturally occurring insect growth hormones to interfere with insect growth and development.

Shockwave contains five active ingredients

- Dual killing agents (Pyrethrum and Esfenvalerate)
- Dual synergized (Piperonyl Butoxide and MGK-264)
- Insect growth regulator (NyGuard® pyriproxyfen)

Shockwave is the ideal clean-out solution for the toughest situations

- Heavy insect populations
- Hard-to-kill insects

Product Specifications

Signal Word	Caution
Packaging	Gallons (4 per case)
EPA Registration Number	1021-1810
Food Handling	For use in food areas and non-food areas
Stability of Undiluted Product	Stable
Stability of Diluted Product	Stable in solution. Agitation recommended; not required. If left diluted in tank, make sure to agitate before reuse.
Appearance	Clear to light yellow
Odor	Slight odor of petroleum distillates
Active Ingredients	Pyrethrins, PBO, MGK 264, Esfenvalerate, Pyriproxifen
Flammability	Combustible liquid
Mode of Action	Sodium channel modulator – disrupts insects' nervous system, insect growth regulator
Class of Chemistry	Pyrethrins, insecticide synergists, IGR
Respirator Required	Required
Mix or Dilute in	Use undiluted or dilute in oil only (refined kerosenes as defined by CFR Title 21,172.884)
Activity	Contact kill, residual activity, IGR effect
Shelf Life	3 years or more if stored at room temperature

Use Areas

Indoors in Food and Non-food Areas, such as:

Homes

Food processing plants

Restaurants

Hotels

Schools

Warehouses

Outdoor Use Around Structures

Dumpsters Garbage cans

Homes

Public buildings

Warehouses

Poultry Houses

Transportation Equipment

Ships

Trains Trucks

CHNICAL BULLETIN

Method of Application

- Mechanical foggers (space spray)
- Thermal foggers
- Compressed air sprayers (surface spray)
- Crack and crevice injection devices
- Aerosol generators
- Power sprayers (poultry houses)

Best Practices when using Shockwave® Fogging Concentrate

Contains petroleum distillates

Do not treat lawns, turf or plants. Do not treat surfaces that may be stained.

Dilute with oil

The Shockwave label allows it to be used indoors either diluted or undiluted. Outdoors it can only be used diluted. Dilute Shockwave with refined kerosenes that meet food additive regulations as defined by CFR Title 21, 172.884.

Ventilate before re-entry

Ventilation is achieved by completely exchanging the air in the room or area 3 times.

Mixing tip

When mixing, add the concentrate first, then dilute with oil, then agitate. If there is a good agitation in the mixing tank or unit, then the mixing order is not as important.

In poultry houses

Remove animals prior to treatment. See label for full directions for use in poultry houses.

Note

Diluted product may look hazy. Keep product agitated as much as possible.

Key Insects Controlled

Shockwave is labeled for the control of insects including, but not limited to:

Almond Moths

Angoumois Grain Moths

Ants

Black Flies

Boxelder Bugs

Brown Dog Ticks

Cadelles

Carpet Beetles

Carrion Beetles

Cereal Beetles

Cheese Mites

Always read and follow label and MSDS directions.
